# **SIEMENS**

### Data sheet

## 6ES7516-3AN01-0AB0

SIMATIC S7-1500, CPU 1516-3 PN/DP, Central processing unit with Work memory 1 MB for program and 5 MB for data, 1st interface: PROFINET IRT with 2-port switch, 2nd interface: PROFINET RT, 3rd interface: PROFIBUS, 10 ns bit performance, SIMATIC Memory Card required

| General information   |  |
|---|--|
| Product type designation  | CPU 1516-3 PN/DP                                     |
| HW functional status  | FS03   |
| Firmware version  | V2.5   |
| Engineering with  |  |
| <ul> <li>STEP 7 TIA Portal configurable/integrated as of<br/>version</li> </ul> | V15 (FW V2.5) / V13 SP1 Update 4 (FW V1.8) or higher |
| Configuration control   |  |
| via dataset   | Yes  |
| Display   |  |
| Screen diagonal [cm]  | 6.1 cm   |
| Control elements  |  |
| Number of keys  | 6  |
| Mode selector switch  | 1  |
| Supply voltage  |  |
| Type of supply voltage  | 24 V DC  |
| permissible range, lower limit (DC)   | 19.2 V   |

| permissible range, upper limit (DC)      | 28.8 V  |
|--|---|
| Reverse polarity protection              | Yes   |
| Mains buffering                          | 165   |
| Mains/voltage failure stored energy time | 5 ms  |
| Repeat rate, min.                        | 1/s   |
| • Repeat fate, film.                     | 110   |
| Input current                            |   |
| Current consumption (rated value)        | 0.85 A  |
| Inrush current, max.                     | 2.4 A; Rated value  |
| l²t                                      | 0.02 A <sup>2</sup> ·s  |
| Power                                    |   |
| Infeed power to the backplane bus        | 12 W  |
| Power consumption from the backplane bus | 6.7 W   |
| (balanced)                               |   |
| Power loss                               |   |
| Power loss, typ.                         | 7 W   |
|  |   |
| Memory                                   |   |
| Number of slots for SIMATIC memory card  | 1   |
| SIMATIC memory card required             | Yes   |
| Work memory                              | 1 Mbyta   |
| • integrated (for program)               | 1 Mbyte   |
| • integrated (for data)                  | 5 Mbyte   |
| Load memory                              | 00 Ob. 4.   |
| Plug-in (SIMATIC Memory Card), max.      | 32 Gbyte  |
| Backup                                   | W   |
| maintenance-free                         | Yes   |
| CPU processing times                     |   |
| for bit operations, typ.                 | 10 ns   |
| for word operations, typ.                | 12 ns   |
| for fixed point arithmetic, typ.         | 16 ns   |
| for floating point arithmetic, typ.      | 64 ns   |
| CPU-blocks                               |   |
| Number of elements (total)               | 6 000; Blocks (OB, FB, FC, DB) and UDTs                                       |
| DB                                       |   |
| Number range                             | 1 60 999; subdivided into: number range that can be used by                   |
| <b>C</b>                                 | the user: 1 59 999, and number range of DBs created via SFC 86: 60 000 60 999 |
| • Size, max.                             | 5 Mbyte; For non-optimized block accesses, the max. size of the               |
| FD.                                      | DB is 64 KB   |
| FB                                       | 0 65 525  |
| Number range                             | 0 65 535  |
| • Size, max.                             | 1 Mbyte   |

| FC   |   |

| Number of variables, max.  | 200  |
| Diagnostic buffer  |  |
| • present  | Yes  |
| Number of entries, max.  | 3 200  |
| — of which powerfail-proof   | 500  |
| Traces   |  |
| Number of configurable Traces  | 4; Up to 512 KB of data per trace are possible                       |

#### Interrupts/diagnostics/status information Diagnostics indication LED Yes • RUN/STOP LED Yes • ERROR LED Yes MAINT LED Yes Connection display LINK TX/RX Supported technology objects Motion Control Yes; Note: The number of axes affects the cycle time of the PLC program; selection guide via the TIA Selection Tool or SIZER 2 400 • Number of available Motion Control resources for technology objects (except cam disks) • Required Motion Control resources 40 - per speed-controlled axis 80 - per positioning axis - per synchronous axis 160 80 - per external encoder 20 - per output cam 160 per cam track 40 - per probe Positioning axis 7 - Number of positioning axes at motion control cycle of 4 ms (typical value) 14 - Number of positioning axes at motion control cycle of 8 ms (typical value) Controller Yes; Universal PID controller with integrated optimization • PID\_Compact Yes; PID controller with integrated optimization for valves • PID\_3Step Yes; PID controller with integrated optimization for temperature • PID-Temp Counting and measuring Yes • High-speed counter

| Ambient conditions                                |  |
|---|--|
| Ambient temperature during operation              |  |
| <ul> <li>horizontal installation, min.</li> </ul> | 0 °C   |
| horizontal installation, max.                     | 60 °C; Display: 50 °C, at an operating temperature of typically 50 °C, the display is switched off |
| <ul> <li>vertical installation, min.</li> </ul>   | 0 °C   |
| • vertical installation, max.                     | 40 °C; Display: 40 °C, at an operating temperature of typically 40 °C, the display is switched off |
| Ambient temperature during storage/transportation |  |
| • min.  | -40 °C   |
| • max.  | 70 °C  |

| Configuration   |                               |
